

## Grants by Grant Cycle

Grants matching your search for **2015-16 Household Hazardous Waste Discretionary Grants (HD24 )**

### Butte County

**Grantee:** Town of Paradise

**Amount Awarded:** \$219,912.00

**Grantee Contact:** Ms Jennifer Arbuckle

**CalRecycle Grant manager:** Matthew Fong

**Project Summary:** The Town of Paradise (Paradise) proposes the expansion of our Permanent Household Hazardous Waste Collection Facility (PPHHWCF) to expand storage capacity for collected materials.

This grant will expand Paradise's current HHW program by: 1) Expanding the facilities storage capacity by installing a 57' x 30' x 16' Pre-Engineered Building and associate concrete infrastructure; 2) Purchasing additional shelving and signage. Shelves will be built to store reusable material, as well as, material waiting to be shipped out for disposal (i.e. 55 gallon drums of HHW, thermostats, Gaylord's with paint destined for Paint Care etc.) Signage will display the proper HHW placards and associated HHW regulated information for employee and public safety.

Paradise believes that expanding the PHHWF is an effective method for making sure our facility is equipped with enough storage capacity to handle the increase of material received as the popularity of the facility continues to grow as a direct result of previous expansion efforts

*Total Awarded for County:\$219,912.00*

### Los Angeles County

**Grantee:** City of Lancaster

**Amount Awarded:** \$55,534.00

**Grantee Contact:** Jocelyn Swain

**CalRecycle Grant manager:** Harnak Samra

**Project Summary:** The City of Lancaster is proposing the expansion of its current Household Hazardous Waste (HHW) Facility. In effort to reduce the demand for HHW disposal, the City of Lancaster wishes to add a cardboard compactor/baler, a propane canister depressurizer, an aerosol can depressurizer, and a re-use structure for residents to "shop" from. Adding a re-use component to its current repertoire of services and enabling more products to be converted to recyclable materials, will reduce and offset HHW disposal while also diverting more material from the waste stream. Additionally, the City proposes to incorporate a couple safety and efficiency features for its collection workers. The installation of a storage container for onsite keeping PPE, first-aid supplies, tools, and equipment will reduce potential spill response time and improve overall functionality of the collection process. Also, a centralized eyewash/deluge station to offer immediate decontamination, and a shade awning to provide workers relief from the extreme summer heat, is proposed for safer and efficient HHW collection.

*Total Awarded for County:\$55,534.00*

### Riverside County

**Grantee:** Riverside County

**Amount Awarded:** \$67,746.00

**Grantee Contact:** Ms. Angela Dufresne

**CalRecycle Grant manager:** Barbara Baker

**Project Summary:** Riverside County Waste Management Department is applying for grant funds to expand its Waste Reduction Program through the County's Household Hazardous Waste Collection Program (HHWCP) using an educational component and Materials Reuse Program (MRP). RCWMD is implementing a MRP at the Palm Springs and Agua Mansa PHHWCF and the Lamb Canyon and Badlands Recycle-Only Facilities. RCWMD is requesting grant funds to purchase equipment and outreach material to educate and promote these increased services.

*Total Awarded for County:\$67,746.00*

**Grant Count:** 3

**Grand Total for Selected Counties: \$343,192.00**
